

# QUANTIFY YOUR HUMAN RISK

## Measure the Immeasurable in Cybersecurity

In the realm of cybersecurity there is one last threat frontier you can no longer afford to ignore, your employees. We believe that to conquer the unconquerable, you must measure the immeasurable. Our groundbreaking Risk Quantification solution finally gives you a way to consistently quantify human risk across your organization in real time, allowing you to more efficiently identify the risks and take action to better protect your organization.

### Improve Executive Alignment

Translate human risk into a language that your executives and board understand. Gain board-level buy-in by demonstrating the impact of human risk on overall security posture and business impact. More easily secure the alignment and resources you need to drive change and improve your security posture.

### Decrease Burden on the Security Team

Reduce the never ending burden on your security team by providing actionable insights. Quickly identify the areas of risk to focus efforts and streamline processes, while also continuing to evaluate what is working and what is not. Empowered with this knowledge, your team can operate with unparalleled efficiency and effectiveness.

### Enhance Security Posture

Improve your overall risk posture with quantifiable metrics that give you visibility into what is working and what isn't so that you can continue to refine your cybersecurity strategy and continuously combat the evolving threat landscape with confidence.

***“What is overwhelming our security organizations is the risky human behaviors and daily human incidents. These smaller missteps are happening millions of times a day and if you want to lower the onerous demand on your security team, you need to focus on Human Risk Management.”***

- Dan Walsh, CISO, VillageMD

## Key Features

Being able to quantify human risk is becoming more and more crucial to stay secure in an ever-evolving threat landscape. Our innovative solution offers a holistic approach that quantifies risk, enhances alignment with executives, and offers more informed decision-making to strengthen your security posture.

### Human Risk Index & Scores

Identify the riskiest (and most vigilant) individuals and segments within your organization using our proprietary, patent pending Human Risk Index and Scores. This risk quantification algorithm helps you to quickly pinpoint the highest risk areas, guiding your efforts where they matter most.

### Empowering Individual Scorecards

Equipping your employees with their personalized risk scorecards creates an understanding of how their behaviors impact overall organizational security and what vigilant activities they can adopt to improve their scores. This is also a fun way to inspire competition across teams or segments to reward vigilance, create a positive security culture, and improve the cybersecurity team's internal brand.

### Dashboards and Reporting

Create broader alignment with the executive team using intuitive dashboards and reports. Present risk data and trends to easily share with senior leadership to create alignment and to demonstrate the impact of the security team's efforts overtime.

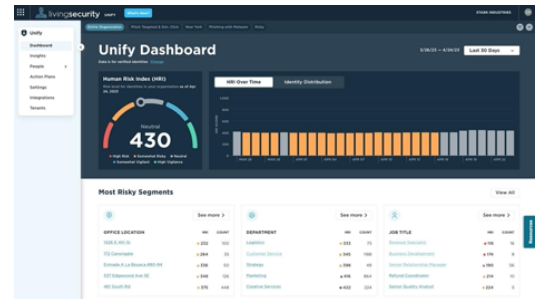

### Automated Data Aggregation & Correlation

Efficiently aggregate and correlate data from your existing security technology platforms, saving you days worth of effort each quarter. Get to consistently quantifying the risk level of human behaviors across your organization faster to take action.

### Data-Driven Cybersecurity Strategy

Leverage human risk data to improve your cybersecurity strategy. Understand what is working and what is not to improve your security posture and revise your strategy, priorities, and budget to align the broader security team and partners around what will have the most impact to your security posture.

Identify the riskiest (and most vigilant) individuals and segments within your organization using our Human Risk Index and Scores.

# Learn how quantifying your human risk can revolutionize your organization's cybersecurity approach. Together, let's build a more resilient future.
