TARGETED HUMAN RISK REMEDIATION

Strengthen Your Security Posture with Precision Remediation

In the fast-evolving landscape of cybersecurity, security leaders require real-time visibility into human risk to effectively mitigate threats and bolster their organization's security posture. Our revolutionary Human Risk Remediation solution provides unparalleled insights, enabling you to concentrate your remediation efforts on the crucial 4% of individuals responsible for a staggering 80% of the risk* so you don't waste your time or your employees'.

Drive Business Alignment
Demonstrate the direct impact on business objectives you'll have by monitoring the impact of targeted human risk remediation. This translation into business language from cybersecurity risk metrics will create stronger alignment, giving security leaders a true seat at the executive table.

Streamline Remediation Efforts for Maximum Impact
Focus your remediation efforts on only the 4% of your employee population who drive the majority of your risk exposure* to achieve substantial risk reduction while setting clear priorities and optimizing resource allocation.

Know Your Human Risk Status, Always
Empower security leaders with real-time visibility into human risk based on individual insights and behaviors across the entire organization. Stay one step ahead of potential threats, enabling timely decision-making, and proactive risk mitigation, resulting in a proactive approach to mitigate risk and improve your organizational security posture.

*The Size and Shape of Workforce Risk: A Cyentia Institute Study

Empower security leaders with real-time visibility into human risk based on individual insights and behaviors.

Key Features

Don't let human risk jeopardize your organization's security. Empower your security team to efficiently protect your organization and remediate the most urgent human risks faster. These key features elevate your security initiatives for a new level of excellence.

Individual Insights and Behavior to Proactively Mitigate Risk

Harness the power of our cutting-edge Human Risk Index and Scores to identify the riskiest and most vigilant individuals and segments within your workforce. Prioritize remediation efforts by delivering targeted training, implementing tailored policies, and deploying specialized tools to address specific areas of concern.

Tailored, Risk-based Action Plans

Efficiently mitigate specific risks by immediately sending an Action Plan to an individual or segment that has been identified as risky. Action Plans can leverage training for the specific risk, tooling changes, or policy adjustments. Measure risk improvements of these groups after the action has been completed.

Real-Time, Actionable Dashboards

Stay in the know with real-time human risk reporting at your fingertips. Our intuitive dashboards provide comprehensive insights, ensuring your security team remains focused on the most critical priorities for effective risk mitigation.

Identify Real Threats Earlier

Take a proactive stance against behaviors that align with true incidents, taking context from an individual's role risk level into consideration using insights and impact modifiers to alert security operations in an automated way mitigating risky behaviors before they escalate. The result is proactively preventing threats and reducing the burden of too many alerts for your team.

Encourage Employee Ownership of Secure Behaviors

Equipping your employees with their personalized risk scorecards creates an understanding of how their behaviors impact overall organizational security and what vigilant activities they can adopt to improve their scores. This is also a fun way to inspire competition across teams or segments to reward vigilance, create a positive security culture, and improve the cybersecurity team's internal brand.

> *"Unify Insights enables us to shift behavior and empower each and every user to be the front line of security defense to help to prevent incidents before they can happen, which is so much more effective than scrambling to clean up if and when they do. This tool should be used for empowerment and positive reinforcement."*
