Release Summary: March 2022

We are delighted to unveil our March 2022 Releases. This update includes enhancements around two main themes: "Improved Administrative Ease of Use" and "Empowering Managers With Visibility and Access" across our suite of offerings. Many of these feature improvements have been requested by you, the users of Living Security Teams, Training and Content.
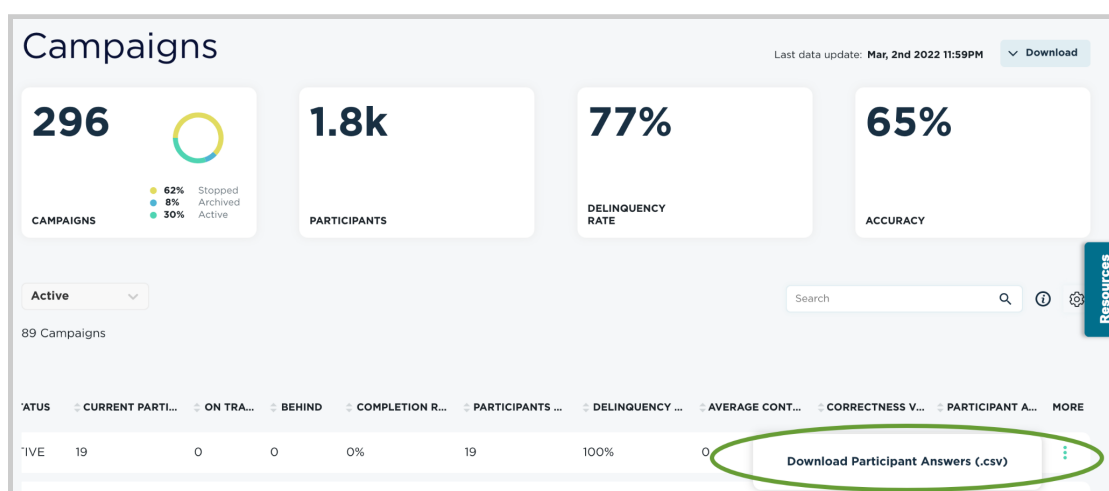

As always, the releases align with our core mission to transform human risk to drive dramatic improvement in human behaviors, organizational security culture, and infosec program effectiveness. Our innovative approach is designed to turn your employees into your best defense.

Improved Administrative Ease of Use

Living Security Training

- Questions Reporting: Better visibility into individual performance
  Understand the questions users are struggling with and who may be missing multiple questions across targeted training for quick remediation.

- Next Generation Report Filters: Filter your Training data by specific attributes of participants, key user segments and campaigns

With this new level of reporting filters, you no longer need to manually download and manipulate data from Training. In the app, you can filter by "Department", "Manager," or "Overdue" to view data for specific user segments.

- User Policy Acceptance: Add Compliance or Organization-specific User Policy Documents that must must be acknowledged or accepted by your end users

Use and Empowering Managers With Visibility and Access

Living Security Teams

- Book a Game for Your Team: Register colleagues for the same event

  Administrators can now add their colleagues' email addresses directly into the session when booking or scheduling a new event. This will improve collaboration and track registrations to ensure all players receive the correct registration information. In addition, calendar invites with game details will automatically update when a session time or date changes, someone is removed, or the session is canceled.

Living Security Training

- Manager Summary Email Customizations: Improve completion with tailored notifications for managers

  Administrators of Training can now customize weekly or daily email notifications for managers with their direct reports' campaign assignments to encourage higher participation and completion rates.

Email Notifications

Send A Summary Of Email Notifications To Participant's Direct Manager

How often should we send emails to Managers?

Everyday

Which Active Campaigns should Managers receive email updates?

All

Edit Manager Email Templates

Additional Enhancements

Living Security Teams

- UI Redesign for Gameplay: Improvements for the user experience

We've included enhancements to user gameplay to ensure an intuitive and smooth experience. Notice improvements to remediating potential technical difficulties (like audio issues), starting the game, completing puzzles, and game progression.
